

Our Vital Statistics...

Did you know...

there are 7.5 million streetlights in the UK

There are 2800 km of UK motorways,
of which 1300 km are lit

WINNER : TSB High Growth
Potential Business 2010
Highly Commended:
Green Technology Award

FACT

Motorway lighting schemes with the Highways Agency represent 50% of its carbon reduction programme - the largest of its kind in the UK.

FACT

MNSO (midnight switch off) on UK motorways will reduce carbon emissions by 3900 tonnes per annum. Minos Systems UK is currently responsible for over 50% of that saving.

FACT

Minos has invested in 3 years of R&D and made substantial financial input into developing the technology required by the Highways Agency and UK energy companies.

FACT

The HA spends £15m per year on lighting energy bills for motorways and major A roads. MNSO has the potential to reduce that spend by up to £6m = 40% saving.

FACT

Of the 7.5m streetlights in the UK, it is expected that up to 70% will be targeted for the carbon reduction programme, subject to survey and consultation.

Streetlighting Control • CCTV • Broadband • Vehicle Battery Charge
